Extremes of temperature.

Extreme weather; lightning strike.

Choking

Additional potential hazards associated with a person's disability

- Weather forecast obtained and previous conditions taken into account.
- Activity adapted or abandoned where appropriate.
- Ongoing risk assessment at start and during activity – weather conditions continually monitored.
- Equipment/clothing lists sent to groups.
- Individuals' kit checked before session to ensure adequate protective clothing and equipment.
- Suitable emergency equipment accessible.
- Session suspended in the event of an electrical storm.
- Group briefed to remove chewing gum/other food before session.
- Additional measures may need to be taken to enable visitors with a disability to access the area on site and engage with the activity.

session suspended in the case of electrical storm or winds in excess of Force 6 (25-30mph)

A discussion with the participant along with visiting staff/carers should be had to decide on the most appropriate way to access the site.

Additional staff may be required.

Additional time may need to be factored into the session.

Handling belts may be used to assist less ambulant users

Less mobile visitors may be more sensitive to environmental conditions and need closer supervision

For visitors with disabilities a discussion with the participant along with visiting staff/carer should be had to ensure the most appropriate PPE is worn.

Hoisting systems should be releasable from the ground.
