Ian Price

Signature:

The following sections should be completed by all staff who need to be made aware of and abide by the findings of the Risk Assessment. NB: If, as a result of a review, changes are made to the Risk Assessment the relevant box on the attached page should be completed as appropriate by the staff concerned.

Extremes of temperature.
Extreme weather; lightning strike.

Illness.

Inappropriate behaviour.

- Instructors and participants made aware of danger zones around the swing
- Pull back rope moved out of way before hoisting
- Mini-Traxion function tested before each haul and instructor ensures traxion has engaged before letting go of haul rope.
- Haul rope speed should be controlled when lowering the haul system back down.
- Weather forecast obtained and previous conditions taken into account. Especially cross winds.
- Activity abandoned when appropriate eg; during electrical storm.
- Ongoing risk assessment at start and during activity – weather conditions continually monitored.
- Equipment/clothing lists sent to groups.
- Individuals’ kit checked before session to ensure adequate protective clothing and equipment.
- Suitable emergency equipment accessible.
- Information about existing medical conditions known by staff.
- Group briefing and management
- Use of ‘Sin Bin’ facility or suspension

Exclusion zone identified before swing is operated and instructors and participants are made aware of why and the potential extremely serious consequences.

Individuals to have access to own inhalers, EpiPen or appropriate medication.

Safeguarding. Choking.	of activity. <ul style="list-style-type: none">• Group briefing and management.• Staff vigilance. • Group briefed to remove chewing gum/other food during activity.
